PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer and Full-Stack Developer with hands-on experience in building machine learning models, web applications, and data-driven solutions. Proficient in Python, SQL, JavaScript, Flask, and modern development tools. Experienced in developing projects involving comment classification, AI-powered applications, RESTful APIs, and responsive web interfaces. Strong foundation in Data Science, Machine Learning, database management, and software development. Currently pursuing a BS in Data Science from IIT Madras, with a passion for solving real-world problems through technology.

EDUCATION

Indian Institute of Technology, Madras <i>Bachelor of Science in Data Science and Applications</i>	Chennai, India <i>Expected 2027</i>
--	--

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, TypeScript, Java, HTML/CSS

Web Development: Next.js (React + TypeScript), Node.js, Express.js, Flask, Vue.js, Jinja2, Tailwind CSS, Bootstrap, Framer Motion, RESTful APIs, DOM Manipulation

Machine Learning & AI: Scikit-learn, Machine Learning, Supervised Learning, Classification, Regression, Feature Engineering, Data Preprocessing, Model Evaluation, NLP Fundamentals

Data Analysis & Visualization: Pandas, NumPy, Statistical Analysis, Tableau, Power BI, Matplotlib, Plotly, Seaborn, Excel (Advanced)

Databases & ORMs: PostgreSQL, MySQL, SQLite, Prisma ORM, Database Design, Query Optimization

Third-Party Integrations: Auth.js (NextAuth), Razorpay, Stripe, Shiprocket API, Cloudinary

Tools & Deployment: Git, GitHub, Vercel, Railway, Render, Hostinger, Linux, VS Code, Google Workspace

Soft Skills: Problem Solving, Data-Driven Decision Making, Research & Analysis, Team Collaboration

PROFESSIONAL EXPERIENCE

Full Stack Web Developer <i>Ments, IIT Madras (Startup)</i>	May 2026 – Present <i>Onsite</i>
- Built and maintained the platform using Next.js (React + TypeScript) on the frontend and Node.js/Express.js on the backend, with PostgreSQL and Prisma ORM for data management - Improved and redesigned key UI components with Tailwind CSS and Framer Motion, enhancing usability and interaction quality across the platform - Diagnosed and fixed backend and server-side issues, improving application stability, performance, and database reliability - Implemented a subscription plan feature end-to-end, integrating Razorpay payment gateway for secure recurring and one-time transactions	
Research Analyst Intern <i>Bug Coders</i>	January 2025 – September 2025 <i>Remote</i>
- Analyzed collaboration data of 250+ R&D units and startups to identify partnership opportunities and enhance client acquisition strategies, driving business development initiatives - Performed comprehensive competitive analysis using business intelligence tools and research frameworks to assess market positioning and uncover growth opportunities - Delivered data-driven insights and strategic recommendations to stakeholders by synthesizing findings from multiple data sources for informed decision-making	

PROJECTS

Toxic Comment Classification <i>Python, NLP, LightGBM, XGBoost, TF-IDF, Scikit-learn</i>	GitHub
- Developed a machine learning model to classify online comments into multiple categories using NLP techniques and feature engineering - Implemented TF-IDF vectorization, feature extraction, and ensemble models (LightGBM, XGBoost) to improve prediction accuracy across multi-label classification tasks - Achieved 0.81+ leaderboard score on Kaggle by optimizing hyperparameters and applying ensemble techniques to boost model generalization	
Placement Portal Web Application <i>Flask, Vue.js, SQLite, Redis, Celery, JWT</i>	GitHub
- Developed a full-stack campus placement portal supporting Admin, Company, and Student roles with secure JWT-based authentication and role-based access control. - Implemented placement drive management, student applications, eligibility validation, resume uploads, and CSV export functionality using Flask and Vue.js. - Integrated Redis caching and Celery background jobs for automated email notifications, reminders, monthly reports, and improved application performance.	

- Designed RESTful APIs and optimized database operations using SQLite, enabling efficient management of companies, placement drives, and application workflows.

Smart Expense Tracker & Budget Management System | *Flask, SQLite, JavaScript, Chart.js, APScheduler* [GitHub](#)

- Developed a full-stack expense tracking and budget management application using Flask and SQLite, enabling users to record, categorize, and analyze financial transactions efficiently
- Implemented RESTful APIs, CRUD operations, budget monitoring, and automated alert generation using APScheduler to help users track spending limits and financial goals
- Built interactive analytics dashboards with Chart.js, providing category-wise expense breakdowns, spending trends, and financial insights through dynamic visualizations
- Integrated email notification services and designed a modular backend architecture with dedicated analytics, alert, and notification modules for scalability and maintainability

CERTIFICATIONS & LEADERSHIP

Certifications: SQL Basic Certification (HackerRank)

Volunteer Experience: Electronics System Volunteer at IIT Madras (November 2023 – December 2023)

Languages: English (Fluent), Hindi (Native)

Interests: Competitive Badminton, Open Source Contribution, Web Development
